Summary

Full Stack Developer (MERN + Next.js) with experience building scalable web applications, integrating Razorpay payment systems, and deploying projects on Vercel. Strong foundation in Data Structures, DBMS, and modern frontend development. Seeking internship and full-time opportunities to contribute to impactful software products.

Education

J.C. Bose University of Science and Technology (CGPA: 8.1)

August. 2023 – May 2026

Bachelor of Technology – Computer Science Engineering (Lateral Entry)

Faridabad, Haryana

Raja Jait Singh Government Polytechnic (CGPA: 8.0)

August. 2021 – May 2023

Diploma – Electrical Engineering (Lateral Entry)

Faridabad, Haryana

Saraswati Vidya Mandir Inter College

August. 2019 – May 2021

Higher Secondary Schooling (84%)

Mathura, U.P.

| • Data Structures | • OOPs Programming | • Computer Networks | • Computer Architecture |
| • Database Management | • Operating Systems | • Software Engineering | • Web Development |

Projects

GetMeAChai – Patreon Clone Web App | *Next.js, MongoDB Atlas, Razorpay API, Tailwind CSS*

January 2026

- Developed a Patreon-inspired donation platform where users can support creators through online payments.
- Implemented features like supporter leaderboard, payment form, and personalized creator pages.
- Built supporter leaderboard and creator pages using dynamic routing in Next.js.
- Built backend functionality using MongoDB Atlas to store supporter messages and manage 50+ donation records efficiently.
- Deployed the full-stack application with a responsive UI and maintained the codebase on GitHub.

PassOP – Password Manager Web App | *React.js, Tailwind CSS, MongoDB, Express, Vercel*

December 2025

- Developed a full-stack password manager using the MERN stack with secure credential handling.
- Implemented complete CRUD functionality to manage 100+ saved credentials with copy-to-clipboard support.
- Designed a responsive UI with Tailwind CSS for smooth user experience across devices.
- Built REST APIs with Express.js and MongoDB for efficient password storage and retrieval.
- Hosted the application on Vercel with version-controlled codebase on GitHub.

MusicPlayNest – Spotify Inspired Music Player | *React.js, Tailwind CSS, JavaScript, Vercel*

December 2025

- Implemented audio controls and playlist navigation supporting multiple tracks and dynamic playback.
- Built a responsive Spotify-inspired music player with a modern UI.
- Implemented audio controls, playlist navigation, and interactive components
- Deployed the project live on Vercel and maintained the code on GitHub

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3, SQL ,Python/Java

Frontend Development: React.js, Next.js (App Router), Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, RESTful APIs, CRUD Operations

Database: MongoDB, MongoDB Atlas, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Vercel (Deployment)

Authentication & Payments: Basic Authentication Concepts, Razorpay Payment Gateway Integration

Additional Skills: API Integration, Environment Variables, Deployment, UI Development Layout Structuring

Certifications/Learning

MERN Stack Fundamentals: Covered core MERN stack technologies React.js, Node.js, Express.js, MongoDB

Node.js Certification: Mastered Node.js fundamentals including Express.js server creation, REST API development

React.js Certification: Completed projects using React.js, Redux, and responsive UI development.

Java Fundamentals Certification: Scaler – Mastering the Fundamentals

SQL (Basic/Intermediate): HackerRank Skill Certification
